

## 4" (100mm) cQuick Installed at Sutherland Road, Reading

On Wednesday 25th November a 4" cQuick Encapsulation collars was installed at Sutherland Road, Reading and successfully sealed a leaking 4" main. Below shows an email from Ben explaining the events that led to this:

Afternoon all,

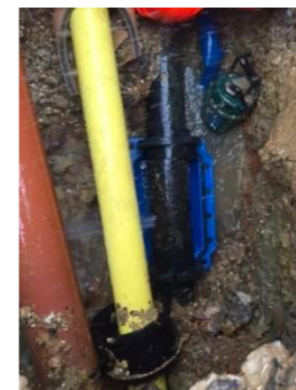

Last night has a call from Edwin struggling to fit a clamp on a 4" main at 30660145 6 Sunderland road RG31 as the N.S.T could not shut the main. He had 6 valves off and wanted to step back which would of meant turning off a further 4 valves with possibility of still not getting the main shut.

After conversation I phoned up Cameron from R2M and set up a site meeting following morning, within about 1-2 hours we had one of their C Quick clamps fitted without calling for shut, nice and easy to fit Cameron lets the lads fit them under his instruction really bit of kit.

Lads use this service for any jobs you can't get shuts for its 24/7 I'll find out how many properties did not have to go off without water, the time for me is the bigger plus

Thanks you for helping out

Ben
